Target Brazil: Executive Overview

Sanjit Kangovi

Siddhartha Sumant Mysore

Rishikumar Mathiazhagan

Krithika Suvarna

Hamsavi Krishnan

Project Overview

- Provide a comprehensive analysis of Target's operations in Brazil, focusing on sales performance and delivery efficiency for the period 2016-2018.
- Highlight key insights to support strategic decision-making in logistics, operations, and revenue optimization.

Intended Users

Delivery Dashboard

Revenue Dashboard

Logistics Team

Finance Team

Operations Managers

Sales and Marketing Team

Senior Management

Senior Management

Dataset Overview

TARGET :

BRAZIL

100,000 orders from
2016 to 2018

ORDER DETAILS

Includes data on order
status, pricing,
payment, and shipping
performance

CUSTOMER AND PRODUCT INSIGHTS

Covers customer locations,
product details, and customer
reviews.

DATASET STRUCTURE

Seven data files, different
aspects of operations

Database Schemas

DASHBOARD 1

Revenue Analysis

Insights:

Finance Managers

- **Revenue and Profitability:** Assess total revenue and profit margins to evaluate financial performance and identify high-performing regions and product categories.
- **Cost Efficiency:** Analyze freight costs to understand their impact on overall profitability and identify areas for optimization in logistics expenses.
- **Customer Payment Preferences:** : Examine customer payment trends to develop targeted financial strategies, including promotions and loyalty programs.
- **Sales Trends:** Track revenue patterns over time to identify peak and low-performing periods, enabling better sales forecasting and resource allocation.

Recommendations: Finance Managers

- **Optimize Freight Costs:** Focus on high-revenue cities like São Paulo and Rio de Janeiro to streamline logistics and reduce freight expenses.
- **Enhance Profit Margins:** Allocate resources to high-performing product categories (e.g., Furniture Office, House Comfort) to maximize profitability.
- **Strategize Payment Options:** Encourage dominant payment methods observed in customer trends through targeted promotions and discounts.

DASHBOARD 2

Delivery Performance

Insights: Operation Managers

- **Delivery Efficiency:** Analyze on-time versus late deliveries by city and product category to identify logistical inefficiencies.
- **Delay Analysis:** Understand delay times for specific product categories to optimize the supply chain.
- **Order Fulfillment Trends:** Monitor fulfillment times geographically to pinpoint regions with prolonged delivery times.
- **Cancelled Orders:** Observe trends in canceled orders to identify recurring issues in the operational process

Recommendations: Operation Managers

- Prioritize resources in cities with high late deliveries (e.g., São Paulo) to enhance delivery timelines.
- Optimize the supply chain for categories with the highest delays, such as "Automotive."
- Implement strategies to reduce cancellations by addressing identified problem areas in the order lifecycle.
